

## **Robert Gross**

More misleading information from Grey2k - 1,351 injuries in 43 months - most of them minor. 22,575 races involving 180,600 individual Greyhounds. Seems to me that Greyhound racing is an extremely safe sport. Considering that Carey Theil's only Greyhound was rushed to the hospital recently due to a serious laceration while on a walk. Looks like the injury rate for his Greyhound is 100%.
