

## GREYHOUND RACING IN THE UNITED STATES

### Greyhound Racing is Cruel & Inhumane

Commercial dog racing is contrary to the values of our community and should end.

In the racing industry, greyhounds are subject to standard practices that are designed to secure the highest return from each individual dog while incurring the least amount of cost. These practices include a system of confined housing, the use of anabolic steroids to prevent estrus in female greyhounds, "4-D" meat as a primary food source, and the disposal of unprofitable dogs. In addition, many greyhounds suffer serious injuries and sometimes die while racing.

### Greyhounds Endure Lives of Confinement

#### Greyhounds are confined for 20 or more hours per day

Racing greyhounds endure lives of terrible confinement. They live inside warehouse-style kennels in rows of stacked cages that are barely large enough for them to stand up or turn around. They are confined for long hours each day, with shredded paper or carpet remnants for bedding.

According to industry statements, greyhounds are kept in their cages for 20 or more hours per day. They are confined perpetually with two exceptions:

1. A few times per month, greyhounds are removed from their cages and taken to a track, where they compete.<sup>1</sup>
2. A few times per day, greyhounds are "turned out" in a large group and allowed to relieve themselves. These turn-outs account for a total cumulative period of three to five hours per day.<sup>2</sup>

*A greyhound at Orange Park in Florida, photo by Vicky Bryan, c. 2013*

#### Racetrack cages are barely large enough for dogs to stand up or turn around

The standard minimum size for dog track cages is 32 inches high, by 31 inches wide, by 42 inches deep, with some slightly larger.<sup>3</sup> They are produced by commercial companies that specialize in racetrack cages, such as G&T Crates.<sup>4</sup>

According to the American Greyhound Council, greyhounds stand between 23 inches and 30 inches tall at the shoulder, and weigh between 50 and 85 pounds.<sup>5</sup> Using these dimensions provided by the industry, large greyhounds cannot stand fully erect in racetrack cages.

## Greyhounds Suffer Serious Injuries While Racing

At dog tracks nationwide, greyhounds routinely suffer serious injuries. These include dogs that suffer broken legs, paralysis, head trauma, and death from cardiac arrest.

- At two West Virginia dog tracks, 5,203 greyhound injuries were reported between January 2008 and December 2013.<sup>6</sup> During the same period, 302 dogs died or were euthanized.<sup>7</sup>
- At Southland Greyhound Park in Arkansas, 525 greyhound injuries were reported between January 2008 and December 2013, including at least 33 dogs that died or were euthanized.<sup>8</sup>
- At Gulf Greyhound Park in Texas, 2,080 greyhound injuries were reported between January 2008 and December 2013.<sup>9</sup> During the same period, 86 greyhounds died or were euthanized.<sup>10</sup>
- At Tucson Greyhound Park in Arizona 56 greyhound injuries were reported in 2013, including 13 dogs who suffered broken legs.<sup>11</sup>
- At Bluffs Run Greyhound Park and Dubuque Greyhound Park in Iowa, there were 896 greyhound injuries reported between January 2006 through December 2013.<sup>12</sup> During the same period, 143 dogs died or were euthanized.<sup>13</sup>

AMF Preclude died after racing on June 17, 2013. Still image from a video by Orange Park Kennel Club, 2013.

### Injury reports document greyhounds who suffered and died

- A two-year-old white and black greyhound named SE's Angel Fire was euthanized after breaking her back during a race at Mardi Gras Racetrack in West Virginia on March 21, 2013.<sup>14</sup>
- On June 9, 2012 a one-and-a-half-year-old red brindle greyhound named SH Transporter was euthanized after breaking his right front leg during at race at Dubuque Greyhound Park. He had to be carried off of the track.<sup>15</sup>
- On February 24, 2011 a three-and-a-half-year-old black greyhound named Bow Rockabilly died after he fell into the rail during a race at Southland Park.<sup>16</sup>

## Greyhound Racing is a Dying Industry

Raynham Park closed in 2010 after Massachusetts voters outlawed dog racing.

### Across the country, dog tracks are closing

Since GREY2K USA formed in 2001, twenty-eight dog tracks have closed or ceased live racing operations. As of June 2014, there are only 21 dog tracks remaining in seven states. Read more on our [state-by-state information page](#).

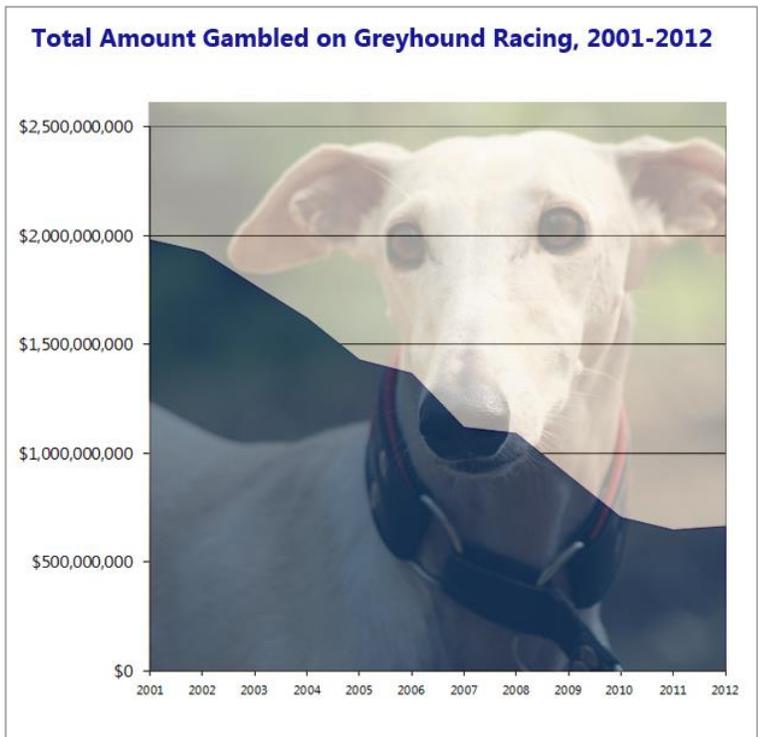

Greyhound racing is a dying industry. This decline is due to increased public awareness that dog racing is cruel and inhumane, in addition to competition from other forms of gambling.

## Gambling on dog racing continues to decline

Between 2001 and 2012, the total amount gambled on greyhound racing nationwide declined by 66%.<sup>17</sup> This includes gambling on live dog racing and simulcast gambling, where bettors wager remotely on races that take place elsewhere.

At the same time that overall gambling on dog racing is declining, a trend toward simulcast gambling continues. In 2012, nearly three-quarters (74%) of all wagers on dog races were made by simulcast.<sup>18</sup>

Similarly, state tax revenue from greyhound racing continues to drop. Between 2001 and 2012, state dog race revenue declined by more than 79%, and by the end of this period represented only \$15 million nationwide.<sup>19</sup> This does not account for regulatory costs. When such costs are taken into consideration, it is likely that states are losing money on greyhound racing.

## Thousands of puppies are bred each year for this cruel industry

*A greyhound with her puppies at a West Virginia greyhound breeding farm. Photo by Erin Davis, 2011.*

According to the National Greyhound Association (NGA), there are 300 greyhound breeding facilities and kennels in the United States.<sup>20</sup> Around 60 of these are in Iowa, with a large number also located in Kansas and Oklahoma.<sup>21</sup>

Females are impregnated, many through artificial insemination by a veterinarian, and have their litters on site.<sup>22</sup> At a few months of age, puppies' right ears are tattooed with their birth date and order. Later, an individual registration number is tattooed in the left ear. While at these breeding facilities, dogs are often kept outside, in large dirt pens with minimal shelter. Greyhounds spend approximately one year at these locations before they begin race training.<sup>23</sup>

There is also evidence that some greyhound puppies disappear from record. According to the Iowa Department of Agriculture and Land Stewardship, the average litter size between 2006 and 2008 was 5.38 puppies per litter.<sup>24</sup> This is remarkably low. National statistics provided by the NGA for the same period indicate a litter size of 6.04.<sup>25</sup> Using the NGA average litter size, a total of 493 Iowa greyhound puppies would not be accounted for during the period of 2006 through 2008.

## Other Issues

### **"4-D" meat is used by the dog racing industry to reduce costs**

At racetracks across the country, dogs are fed a diet based on "4-D" meat.<sup>26</sup> This is meat derived from dying, diseased, disabled and dead livestock that has been deemed unfit for human consumption.<sup>27</sup> The United States Department of Agriculture requires that charcoal be added to this meat to discourage human use.<sup>28</sup> According to an industry handbook, 4-D meat is used at commercial dog tracks because "it is the most economically feasible for the Greyhound industry at this time."<sup>29</sup>

*4-D Meat at Tucson Greyhound Park, 2010*

As a result of eating 4-D meat dogs can be exposed to pathogenic microorganisms, including *Salmonella*, *Campylobacter jejuni*, and *Escherichia coli*.<sup>30</sup> In addition, the use of 4-D meat can lead to false drug positives due to drug residues that dogs ingest and pass into the urine.<sup>31</sup> According to the U.S. Food and Drug Administration, raw 4-D meat "may present a potential health hazard to the animals that consume it and to the people who handle it."<sup>32</sup>

The dog racing industry defends the use of 4-D meat by claiming that it is also used by commercial pet food companies. While it is true that 4-D meat may be found in commercial pet foods, the use of 4-D meat at commercial dog tracks is distinctive because it is fed to dogs raw. Cooking meat destroys bacteria, but greyhound trainers are reluctant to do so for fear of negatively impacting racing performance.

### **Greyhounds are sometimes transported in a dangerous manner**

*Photo from Iowa Greyhound Association newsletter, 2006*

Because dogs typically race at several tracks during their career, industry haulers transport large numbers of dogs from one track to another. During this process, dogs are often transported in cramped conditions, and some undergo cross-country trips in aluminum trailers.

In recent years, there have been several documented cases of greyhounds dying while being transported. For example, in 2010 two haulers were suspended for 30 days and fined \$500 after eight greyhounds died while being transported from Oklahoma to Arizona.<sup>33</sup>

### **Thousands of dogs are killed every year when they are no longer profitable**

Thousands of greyhounds are still killed every year. Because several states do not keep adequate public records, there are no verifiable statistics on the number of dogs killed nationally. Estimates range from 3,000<sup>34</sup> to 8,567.<sup>35</sup> In 2011, the National Greyhound Association acknowledged that there are "no cumulative annual records" available regarding the ultimate fate of racing greyhounds.<sup>36</sup>

## Greyhounds sometimes test positive for serious drugs like cocaine

In recent years, greyhounds have repeatedly tested positive for cocaine and other drugs. In January 2011, a local television station reported that seven greyhounds had recently tested positive for cocaine at Daytona Beach Kennel Club.<sup>37</sup> In December 2009, a greyhound trainer was fined \$50 after a dog named Kiowa Fly Lucia tested positive for cocaine at Mobile Greyhound Park in Alabama.<sup>38</sup> In yet another case, a greyhound named Scotty Smalls tested positive for cocaine at Orange Park in Jacksonville, Florida in January 2010.<sup>39</sup>

## Female greyhounds are routinely given anabolic steroids to prevent estrus

Throughout the country, female greyhounds are given anabolic steroids to prevent estrus. According to [Care of the Racing and Retired Greyhound](#), this practice can cause side effects including increased aggression, weight gain due to water retention, loss of vigor, and virilization.<sup>40</sup>

## Greyhounds race in extreme weather conditions

Across the country, dogs race on the hottest days of summer and the coldest days of winter. For example, five greyhounds suffered from heat exhaustion/stress after racing on hot days in May 2008, February and July 2010, and August 2011 at Southland Greyhound Park.<sup>41</sup>

## Greyhound Racing: Quick Facts

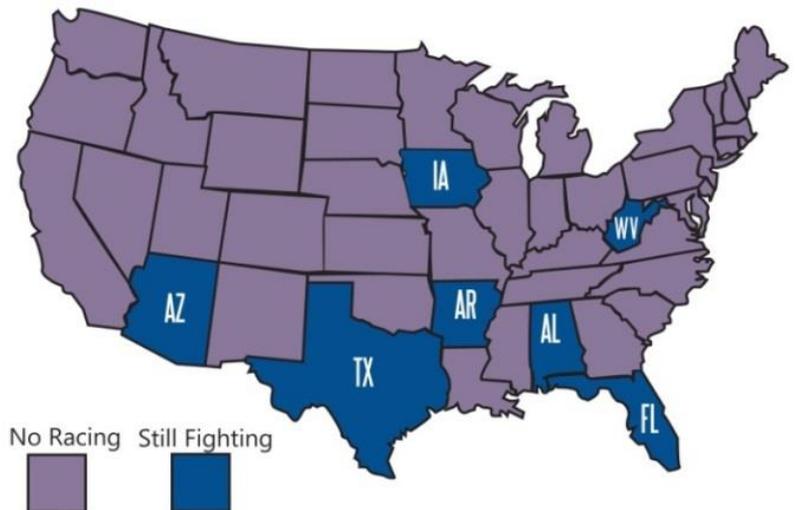

---

### How many states offer live dog racing?

There are currently 21 operational dog tracks in 7 states.

### What are the most recent states to prohibit dog racing?

Maine (1993), Virginia (1995), Vermont (1995), Idaho (1996), Washington (1996), Nevada (1997), North Carolina (1998), Pennsylvania (2004), Massachusetts (2008, effective 2010), Rhode Island (2010), New Hampshire (2010) and Colorado (2014) are the most recent states to prohibit dog racing. The United States Territory of Guam also outlawed greyhound racing in 2010.

### What dog tracks have recently closed?

The following racetracks have closed or ceased live racing operations since 2001: Seminole Greyhound Park (FL), St. Croix Meadows (WI), Pueblo Greyhound Park (CO), Apache Greyhound Park (AZ), Multnomah Greyhound Park (OR), Plainfield Greyhound Park (CT), Geneva Lakes Kennel Club (WI), Post Time (CO), Shoreline Star (CT), Cloverleaf Kennel Club (CO), Jacksonville Kennel Club (FL), Tampa Greyhound Park (FL), Wichita Greyhound Park (KS), Corpus Christi (TX), Mile High (CO), The Woodlands (KS), Hinsdale Greyhound Park (NH), The Lodge at Belmont (NH), Seabrook Greyhound Park (NH), Wonderland Greyhound Park, (MA), Valley Park (TX), Phoenix Greyhound Park (AZ), Guam Greyhound Park, Raynham Park (MA), Dairyland Greyhound Park (WI), Twin River (RI), VictoryLand (AL) and Jefferson County Kennel Club (FL).

## How many dogs are required to operate a greyhound racetrack?

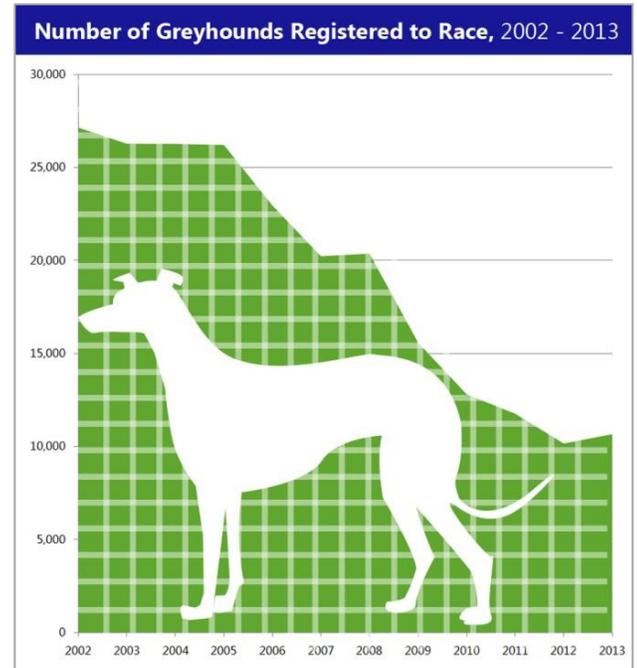

On average, a population of 500 to 1,000 dogs is required to operate a commercial racetrack. Greyhounds generally compete at several tracks, in multiple states, during their short careers.

## How many dogs are bred for racing, and adopted, each year?

As dog tracks close, the number of greyhounds bred for racing continues to shrink. 10,657 individual dogs were registered to race in 2013, as compared to 27,142 in 2002.<sup>42</sup> The number of greyhounds adopted into loving homes each year is unknown.

## Where does greyhound simulcast gambling occur?

In addition to live dog racing, greyhound simulcast betting exists in several states including Colorado, Connecticut, Idaho, Massachusetts, Montana, Nevada, New Hampshire, North Dakota, Oregon, Rhode Island, South Dakota, Wisconsin and Wyoming. In these states, gamblers are supporting the dog racing industry even though there is no active dog track in their community.

## Join the Team: Help End the Cruelty of Dog Racing

### Help a dog and make a new friend by adopting a rescued greyhound

To learn more about adopting a greyhound and to find a local adoption organization in your area, visit our adoption directory at [www.GREY2KUSA.org/adopt](http://www.GREY2KUSA.org/adopt)

### Support GREY2K USA and our national campaigns

GREY2K USA Worldwide is a non-profit greyhound protection organization with supporters in the United States and throughout the world. To end greyhound racing, it will take the support of everyone who cares about dogs. To date, volunteers nationwide have contributed their time, money, and talents to help end this cruelty. To find out how you can help, visit us at [www.GREY2KUSA.org](http://www.GREY2KUSA.org) or call 781.488.3526.
